At the recent Wool-grower's Convention in Springfield, Illinois, it was stated that there are in that State 2,000,000 sheep, worth \$8,000,000, yielding annually \$3,000,000.

At West Hurtford, Vt., the ice formed a dam in the river, causing the water to rise to the second story window of the hotel. A daughter of the landlord was drowned. A remarkable meteor has been seen by daylight

It exploded in the air with a loud explosion and tremandous shock. By a vote of the West Virginia Legislature, the capital of that State is to be transferred from

Duke of Marlborough, valued at \$50,000,000. It is said that Simeon Cameron began life as jour printer. The Mobile Times understands by this that he went to the case as soon as he was old enough to know how to steal sorts and duplicate

Hon. C. P. Gage, State Senator from Mobile and Hon. DAVID Cropron, of Macon, are suggested as candidates for the Governorship of Alabama.

The Huntsville Advocate thinks Congress will knock all such little arrangements into a cocked hat, and prefers to stay out for the present. A Turin journal states that there is a family in that city, consisting of five persons, who for the last year have lived upon cat's flesh. The oldest

boy, twelve years old, does the hunting and provides for the household. The feline race is gradually disappearing from the neighborhood. The New York Times suggests to General GRANT

to issue a daily bulletin of his opinions, that there may be no mistake concerning them. As things now are, his authority is claimed in favor of every political scheme that any member of Congress, any editor, or any nobody takes it into his head According to French papers, agricultural statis-

MONDAY MORNING, FEBRUARY 18, 1867. THE ROPER HOSPITAL

By reference to our advertising columns of this morning, it will be seen that the Board of Trustees of the Roper Hospital officially announce the opening this day of their favorite institution. In bygone days this hospital used to be deservedly popular, and under the same experienced Board of Directors, it will again become so. It is the only building within the city limits suitable for an hosday by receiving a bill of lading for ten boxes of pital, and was built with special care to the comfort and health of its inmates. The sick who seek an asylum under its roof will not only find every comfort and attention from its officers, but will be surrounded by cheerful scenes to divert their minds. To the building is attached a handsome flower garden, and from its numerous piazzas a beautiful view of the distant river and islands can be enjoyed. The usefulness of the establishment is so well known, and the comfort of the inmates so constantly studied, that we expect soon to hear

Besides the poor sick, to whom the wards are always open, the building contains a number of chambers into which are received pay patients. Such can here find excellent accommodation, good food, professional nursing, and skilled medical attendance, all for the small charge of one dollar per day, which sum includes everything. Strangers visiting the city, when taken sick, should bear this in mind. When sick, away from friends, they can obtain all the comforts of home at the Roper Hospital, and have their medical attendance included for one-fourth the amount paid for board in an hotel. Any sick person can gain admission into this Hospital by obtaining an order from the Mayor, or from any one of the members of the Board of Trustees. Special wards are assigned to colored persons, and the same care bestowed upon them as upon the white patients.

Mr. Roper, to whose beneficence the city is indebted for this noble charity, instructed his executors to extend the comforts of his Hospital to all applicants, whether white or black, citizens or strangers. In carrying out his instructions the Trustees of the Institution will welcome any suf-

REFORM IN ENGLAND.

On Monday last the mob. vulg., known as the Reform League in London, had another "grand opened a revolver at his sweetheart, the other day, and air" demonstration. Mr. DISEARLY, the Chancellor pulled the trigger. To his horror the pistol was of the Exchequer, that same evening, as if 'ntimi-House of Commons that the Government meant to acres, between 60 and 70 of which have been plan House of Commons that the Government meant to past summer. Only two weeks for themselves and all parties to December 2. only two weeks for themselves and all parties to prepare for the issue. The League at for "manhood suffrage," but this, it is pretty certain, they will not yet get. There will doubtless be a concession of further political privileges-and the privilege of the elective franchise will be given to many now excluded—but conservatism has still a stronghold in England; and they will be slow to adopt such Jacobin principles of policy, especially as they have a striking example of their working in the distracted condition of America.

> SOUTH AMERICAN AFFAIRS.—The news from South America contains the usual variety of warlike and insurrectionary rumors. There is serious trouble in the United States of Colombia. President Mos-QUERA has made himself obnexious to the Congress-that body following the example of its great prototype and model of the North, talks about "impeachment." This unpleasant ceremony the President proposes to avoid by preventing Congress from meeting. The quarrel, it is expected, will be an interesting one, and residents of Bogota, the capital, are moving away that they may enjoy it from a distance. The American Minister having also had a difficulty with Mosquera, was preparing to depart, and a general revolution in the State is reported imminent. Brazil and Paraguay are renewing their contest with vigor, and the former Government, it is said, had offered to emancipate 20,000 slaves, provided they would enter the army now organizing to march against Paraguay. The end of the war seems as remote as ever. There is a rumor that Lorez intended declaring himself Emperor, and hoped for the recognition and friendship of France. It would take half-a-dozen prophets to foretell the result of South American dissensions, and reveal the future of that unhappy

THE AMAZON. -This greatest river of the South American region, destined to be a seat of empire at some day equalling, perhaps, that of the great valley of the Mississippi, is attracting more and more the attention of the civilized world. Prof. AGASSIZ, who, under advantageous auspices, made extended Brazilian explorations a year or two ago, aided by a proper scientific corps, is now lecturing on the subject in New York. He describes the peculiarities of the Amazon and its affluents, and gives an interesting account of the natural products of that fertile region, and adds an earnest plea for the extension of American commerce in the Brazils. He presents, with much force, the new openings for commercial enterprise which are afforded by the free navigation of the Amazon; speaks particularly of the three hundred varieties of hard woods growing in Amazonian forests, the introduction of which into the world's markets, for building purposes, would be of the utmost value; alludes to the waste of native productions by the present indolent population, and warmly urges the necessity of establishing settlements in the valley of the Amazon, in order to develop its

mmense resources. THE FUTURE OF THE COUNTRY .- During the debate on the WILLIAMS Reconstruction Bill, Mr. BANKS, of Massachusetts, after opposing that measure on various grounds, said "it was imposmeasure on various grounds, said "it was impossible that the Government show'd go on for three LACE AND MUSLIN CURTAINS. years longer, or two and a half years, or two years, without approaching the verge of rvin. Business was suspended now. The people were oppressed with taxes. Laborers were thrown out of employment. Everything was unsettled. The wisest man cor'd not look to the future without apprehension, if not without feer. The future was full of danger, and rather than face that danger for two and a half or three years longer the repreof danger, and rather than face that danger for sentatives of the people would be obliged to con sider the condition of the country and what course of conduct was necessary for the safety of the Government and the interests of the people."

As we expected, Radicalism is already beginning to sneer at Mr. Peabody's recent munificent gift for educational purpose; in the South. His failure to specify in a particular manner the beloved freedmen, is not at all satisfactory. Last week the Inuirer, of Philadelphia, opened its batteries, by attacking that portion of the gift which includes the bonds of the Planters' Bank of Mississippi, and coolly asserted that "the ruling population of the South is not honest."

SHARP.-Tuesday the Philadelphia Ledger contained the following exceedingly proper allusion to Yankee enterprise:

The newspapers are universally complaining that the speeches delivered at the recent meeting in Boston for aid to the people of Candia have been p inted in a pamphlet, to be sold for the benefit of the suffering Cretaus and read by the suffering Americans. The Boston philanthropists thus gain a little cheap notoriety, the rest of the country paying the expense—a sharp New England trick that has been played several times be-
